Aaron Lad

(825) 343–2012 | ladaaron15@gmail.com | linkedin.com/in/aaron-lad | github.com/amlad15 | Edmonton, AB, Canada

Education

University of Alberta — Edmonton, AB, Canada

Bachelor of Science in Computing Science, Minor in Economics — *Expected May 2026*

- Regional Excellence Scholarship – $5,000 CAD (2023) | International Admission Scholarship – $5,000 CAD (2022)

Professional Experience

Partner & Head of Web Development — Dec 2024 – Aug 2025

Unconventional Media — *Canada*

- Led **full-stack web development** for **12+ client businesses** across 5 industries, delivering **responsive, accessible** websites averaging **2-week turnaround** per project.
- Managed and mentored a team of **3 developers**, enforcing **code quality standards**, **WCAG accessibility** compliance, and on-time delivery across **100% of client deadlines**.
- Drove **30%+ revenue growth** through targeted outreach strategy design and long-term client relationship management, helping guide the company to profitability within **6 months**.
- Conducted hiring interviews and contributed to organizational culture and **12-month growth roadmap**.

Administrative Associate — May 2022

Hydrotec International L.L.C. — *Oman*

- Organized a corporate event for **100+ attendees**, coordinating all logistics, invitations, scheduling, and post-event documentation with zero day-of issues.
- Maintained and updated a **CRM database of 200+ contacts**, ensuring data accuracy and timely follow-up communications.

Associate – Customer Acquisition — Jan 2021 – Mar 2021

Hydrotec International L.L.C. — *Oman*

- Researched and qualified **50+ business leads** across target verticals, improving sales team outreach efficiency by an estimated **40%**.
- Built and maintained a **prospect database of 120+ companies** using market research and LinkedIn outreach, directly supporting **3 closed deals** in Q1 2021.
- Drafted **10+ outreach email templates** adopted company-wide, reducing prospecting time per rep by approximately **25%**.

Projects

Global Conflict Intelligence Dashboard (GCID) | ***Next.js, TypeScript, Node.js, PostgreSQL/PostGIS, Socket.IO,*** *Leaflet, Ollama* Jan 2026

- Built a **real-time OSINT platform** tracking **4 live data streams** – aircraft, maritime vessels, conflict events, and news – visualized on an **interactive geospatial map**.
- Integrated **4 external APIs** (**OpenSky**, **AISStream**, **ACLED**, **GDELT**) with **WebSocket** streaming for sub-second live geospatial updates.
- Implemented **PostGIS spatial queries** and **anomaly detection** algorithms identifying conflict spikes and military clustering across **200+ daily events**.
- Embedded a local **LLM analyst** (**Ollama**) delivering real-time geopolitical intelligence summaries with **zero API cost**.

YT-Spotify Playlist Converter | ***Next.js 14, TypeScript, React.js,*** *Spotify Web API, YouTube Data API v3,* ***NextAuth.js,*** *Vercel* Mar 2026

- Built and deployed a **full-stack web app** enabling seamless **YouTube** ↔ **Spotify** playlist transfer – paste a URL, authenticate, and playlists are recreated in **under 30 seconds**.
- Engineered **dual OAuth session management** via **NextAuth.js**, maintaining simultaneous Spotify and Google tokens across providers without session conflicts.
- Developed **fuzzy title-matching** logic against the **YouTube Data API v3** achieving **85%+ song match accuracy** across varied playlist types.
- Deployed on **Vercel** with **CI/CD** pipeline.

DeepForge – Multi-Agent AI Development System | ***Python, Ollama, DeepSeek Coder, AI Agents*** — Feb 2026

- Architected a **multi-agent AI workflow** simulating a full software team across **4 specialized agents**: planner, coder, reviewer, and builder.
- Implemented **local LLM agents** to collaboratively generate, review, and assemble production-ready code with **zero external API dependency**.
- Explored **prompt engineering**, **agent coordination**, and fully **automated development pipelines** end-to-end.

Gitabot – Bhagavad Gita AI Chatbot | ***Python***, ***NLP***, *Mobile App Integration* Dec 2024 – Jan 2025

- Developed an **AI chatbot** grounded in Bhagavad Gita knowledge, handling **700+ verse-based Q&A pairs** across philosophical and real-world topics.
- Curated a **custom NLP dataset** with semantic structuring and preprocessing for accurate **query retrieval** across **18 chapters** of source material.
- Integrated into a **mobile application** delivering conversational Gita-based insights to **50+ beta users**.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS, Bash, YAML
Frameworks: React.js, Next.js, Node.js, Streamlit
AI / ML: LLM Integration, Ollama, AI Agents, NLP, Prompt Engineering, AI/ML Prototyping
Data & Databases: PostgreSQL, PostGIS, Power BI, Data Visualization, Data Engineering, REST APIs
DevOps & Cloud: Docker, Kubernetes, CI/CD, GitHub Actions, AWS, Linux
Tools: Git, GitHub, WebSockets, Leaflet, UX/UI Principles

Certificates

Python Programming – Rice University | **Python Data Structures** – University of Michigan | **AWS for Developers** – LinkedIn Learning | **REST API Development** – LinkedIn Learning | **Strategic Management** – Copenhagen Business School

Additional

Languages: English (Fluent), Hindi, Marathi
Interests: AI & Automation, Algorithms, Economics, Finance, Product Design, Trading & Stocks, Football, Formula 1, World Politics, Content Creation
